

### Key Plan

## General Notes

2. ALL OPERATIONS INVOLVING LIFTING AND CARRYING MUST BE DONE WITH THE FEET, NOT THE BACK. THE FEET MUST BE POSITIONED UNDER THE LOADS, NOTED OUTWARD, 30 TO 45 DEGREES FROM THE MIDLINE, ONLY WHEN THE FEET ARE TO BE PULLED.

3. AN OPERATOR MUST BE ABLE TO HOLD A STABLE POSITION, NOT SWAYING OR ROCKING, WHILE WORKING.

4. ALL DIMENSIONS AND ANGLES ARE TO BE CONFIRMED AND CHECKED FOR ERRORS. SMALL, BUT FREQUENT, CHECKS ARE BETTER THAN CORRECTIONS OF ERRORS.

5. ALL DRAWINGS ARE TO BE COMPLETED BEFORE WORK.

6. ALL OPERATIONS ARE TO BE COMPLETED WITH ALL SPECIFIED DIMENSIONS, TOGETHER WITH THE SPECIFIED TOLERANCES.

AREA SMT	
	8861.181
Grand total: 1
